

# TOP TOOLS THAT CAN BE USED TO LOWER YOUR HEALTHCARE COST

## FOCUS ON QUALITY

Quality healthcare – cost and quality have an inverse relationship in healthcare, the better the quality is most often less expensive.

## LOCATION MATTERS

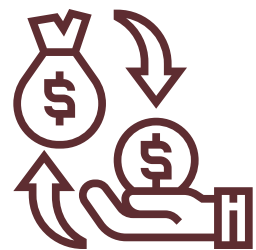

When someone has service issues, from the cost and quality between one hospital to another in the same market, to differences between a hospital or a specialist surgery centers, or imaging centers, the location of where healthcare is consumed can be life or death... in addition to less expensive.

## ALTERNATIVE REIMBURSEMENTS

The days of the PPO's are dying... access to more direct and transparent reimbursement structure can reduce healthcare cost dramatically.

These methods include:

- ✓ Direct Contracting
- ✓ Bundled and Cash Payments
- ✓ Reference-Based Pricing

## OPTIMIZATION OF RX

Adding transparency to your Rx program can save you an immediate 20–30% on your Rx cost.

Using alternative methods to access prescriptions has made an immediate impact. From sourcing internationally or understanding that the program can help members obtain patient assistance, these alternative access strategies cannot be done in the status quo.
